# Procedure for Submitting an Application for Admission by Non-EU Students Holding a Qualification Obtained Abroad

## II level professional Master "Broncoscopia e Pneumologia Interventistica" (Bronchoscopy and Interventional Pulmonology) a.y. 2026/27

Non-EU citizens residing abroad who hold a qualification obtained from a foreign university (EU or non-EU), equivalent to one of the degrees accepted as an entry qualification for admission to the Master's programme (Medicine and Surgery Second Cycle Degree), must, in addition to submitting the application for admission to the Master's programme according to the procedures and within the deadlines specified in the Call for Applications, register on the Universitaly portal at:

www.universitaly.it

Registration on the Universitaly portal is a prerequisite for the issuance of a study visa by the competent Italian diplomatic missions.

At the end of the selection procedure, through the Universitaly portal, the University will notify the competent diplomatic missions of the student's acceptance or, where applicable, of the successful outcome of the admission tests, in order to allow the issuance of the study visa.

In order to facilitate the timely issuance of the study visa, applicants (non-EU students residing abroad) may complete their application on Universitaly and on the University's online application system (first phase – admission) **from 15 September 2026 to 15 October 2026**. On that date, the applications submitted will be assessed and, in the event of a positive assessment, the corresponding application on Universitaly will be validated.

Upon receiving positive assessment and validation on Universitaly, students should follow the instructions for enrolment in the Call for admission, or contact the administrative office for further guidance: master-bio@unifi.it
